Education

Federal University of Santa Maria (UFSM) March 2023 – December 2026 (Expected)
Internet Systems GPA: 8.63/10.0
Web Development, Backend, Frontend, Cloud Computing, RESTful APIs, Databases (SQL and NoSQL), DevOps, Information Security, Software Architecture, UI/UX Design.

Professional Experience

Software Engineer and Project Manager April 2025 – June 2026
CompactJR

- Led the management and Full-Stack development of an ERP system for Junior Enterprises. Architected and implemented the solution using **Node.js** on the backend and **React (TypeScript)** on the frontend, unifying team allocation tracking into a single official platform.
- Structured collaborative code versioning with **Git** across the development team and orchestrated deployments using **Docker** to ensure environment standardization.
- Managed the end-to-end creation of the company's new institutional website. Orchestrated the technical team, defined schedules, and conducted direct negotiations with stakeholders. The delivery ensured strategic alignment and resulted in a significant increase in organic traffic.
- Pioneered the introduction of agile practices in the company, structuring workflows with **GitHub Kanban** for continuous task tracking and **Lucidchart** for visual business process mapping.

Sales Associate February 2024 – May 2024
World Tennis

Direct customer service, focusing on the development of interpersonal skills, effective communication, and rapid resolution of customer needs in a dynamic environment.

Projects

Journey – Inventory Management Ecosystem

- System developed end-to-end to optimize the sales and inventory flow for the Journey clothing brand, ensuring real-time accuracy. The complete ecosystem was containerized using **Docker**.
- **Backend:** Architected with **Java (Spring Boot)** for robust business rule processing, using **Mermaid** for technical documentation. Repository: https://github.com/FeltrinLM/Journey_Back-end
- **Frontend (Web):** Responsive administrative interface built with strict typing using **Angular (TypeScript)**. Repository: <https://github.com/FeltrinLM/JourneyFront-end>
- **Mobile:** Application developed in **Flutter** with offline-first support, ensuring sales capabilities even without a connection. Repository: https://github.com/FeltrinLM/journey_mobile

LENPA – Laboratory Scheduling Management

- Corporate system designed to automate schedule management for the LENPA laboratory at the Federal University of Santa Maria (UFSM), eliminating scheduling conflicts. The entire environment was isolated via **Docker**.
- **Backend:** Built with **Java (Spring Boot)** for rigorous reservation validation and relational database modeling with **PostgreSQL**. Repository: https://github.com/FeltrinLM/LENPA_backend
- **Frontend:** Interactive application developed with **Angular (TypeScript)** for dynamic calendar and event visualization. Repository: <https://github.com/FeltrinLM/LENPA-frontend>

Room Management – UFSM Polytechnic College

- Developed a centralized room reservation system in a team setting, eliminating physical scheduling overlaps and standardizing space requests for the institution.
- **Backend & Architecture:** Solution orchestrated in **Python (Django)** focused on the application of Design Patterns to ensure scalability, integrated with a **MongoDB** (NoSQL) database for flexible data and session manipulation.
- **Frontend:** Creation of a functional interface using **HTML, CSS, and JavaScript**, focused on accessibility and clarity for the end-user.

Certifications

Cloud Computing – 40h October 2023
Federal University of Santa Maria (UFSM) in partnership with Huawei ICT Academy

EF Standardized English Test: Advanced (C1) June 2022
EF Education First
